

DX272

Description

The E/One model DX explosionproof grinder pump is engineered to meet the stringent Factory Mutual™ explosionproof equipment standards for use in locations classified as Class I, Division 1, Group D (approval standards 3600, 3610, and 3615). The DX272 is a 275-gallon capacity grinder pump station that contains two explosionproof grinder pumps. Note: Only the pumps are listed by FM for explosionproof equipment.

General Features

The DX272 comes complete with a self-contained level control system, eliminating troublesome float switches. The pump uses radio frequency identification (RFID) technology to communicate between the level controls and the motor controls. The grinder pumps are automatically activated and run infrequently for very short periods.

The internal check valve assemblies, located in the grinder pumps, are custom-designed for non-clog, trouble-free operation.

- 275 gallons (1041 liters) of capacity; HDPE tank and lid
- Rated for flows of 5000 gpd (18,927 lpd)
- Available in heights of 129 inches and 160 inches; height adjustment can be performed in the field

E/One requires that the Uni-Lateral, E/One's own stainless steel check valve, be installed between the grinder pump station and the street main for added protection against backflow.

Operational Information

Motors

1 hp, 1,725 rpm, high torque, capacitor start, thermally protected, 240V, 60 Hz, 1 phase

Inlet Connections

4-inch inlet grommet standard for DWV pipe. Other inlet configurations available from the factory.

Discharge Connections

Pump discharge terminates in 1.25-inch NPT female thread. Can easily be adapted to 1.25-inch PVC pipe or any other material required by local codes.

Discharge (per pump)

15 gpm at 0 psig (0.95 lps at 0 m)

11 gpm at 40 psig (0.69 lps at 28 m)

7.8 gpm at 80 psig (0.49 lps at 56 m)

DX272

SEMI-POSITIVE DISPLACEMENT TYPE PUMP
EACH DIRECTLY DRIVEN BY 1 HP MOTOR
CLASS I, DIV 1, GROUP D

NOTE:

THE PUMP ASSEMBLIES ARE LISTED BY ETL TO FACTORY MUTUAL (FM) STANDARDS FOR CLASS I, DIVISION I, GROUP D, THE LEVEL CONTROL SYSTEM, INTEGRAL TO THE PUMP, IS INTRINSICALLY SAFE (THE STATION IS NOT PART OF THE LISTING)
-ALSO AVAILABLE APPROVED BY CSA FOR CLASS 1, DIVISION 1, GROUP D
